

# Package ‘Tushare’

October 12, 2022

**Type** Package

**Title** Interface to 'Tushare Pro' API

**Version** 0.1.4

**Author** Feifei ZHANG

**Maintainer** Feifei ZHANG<tushare\_pro@163.com>

**Description** Helps the R users to get data from 'Tushare Pro'<<https://tushare.pro>>.

'Tushare Pro' is a platform as well as a community with a lot of staffs working in financial area.

We support financial data such as stock price, financial report statements and digital coins data.

**License** GPL-2

**Encoding** UTF-8

**Imports** httr, tidyverse, forecast, data.table

**NeedsCompilation** no

**Repository** CRAN

**Date/Publication** 2022-03-21 08:50:09 UTC

---

Tushare-package      *Interface to 'Tushare Pro' API*

---

## Description

Helps the R users to get data from "Tushare Pro". "Tushare Pro" is a platform as well as a community with a lot of staffs working in financial area. We support financial data such as stock price, financial report statements and digital coins data.

---

 pro\_api

*Tushare api to get data*

---

### Description

After passing your token you get the api. Let's name it 'pro' (such as `pro = Tushare::pro_api(token = 'YOUR TOKEN HERE')`). Then you can call `pro(api_name = 'API_NAME', other_params = 'YOUR OTHER PARAMETERS')` to get data.

### Usage

```
pro_api(token)
```

### Arguments

token                    Your token. You can obtain it from Tushare Pro website after logging.

### Examples

```
## step 1. Use your token and call Tushare::pro_api to get pro_api interface
## You can get your token from the Tushare Pro website<https://tushare.pro>.
## Check details via visiting <https://tushare.pro/document/1?doc_id=38>
## and <https://tushare.pro/document/1?doc_id=39>.

## Not run: pro <- Tushare::pro_api(token = 'YOUR TOKEN HERE')

## step 2. Use pro to call each data api via passing "api_name" and other optional parameters.

## Not run: pro(api_name = 'daily', ts_code='000001.SZ', start_date='20180702', end_date='20180704')
## This code will return daily k-line information of stock '000001.SZ' from 20180702 to 20180704.
##   ts_code trade_date open high  low close pre_close change pct_change   vol   amount
## 1 000001.SZ  20180704 8.63 8.75 8.61 8.61    8.67 -0.06    -0.69 711153.37 617278.559
## 2 000001.SZ  20180703 8.69 8.7 8.45 8.67    8.61  0.06     0.7 1274838.57 1096657.033
## 3 000001.SZ  20180702 9.05 9.05 8.55 8.61    9.09 -0.48    -5.28 1315520.13 1158545.868
```

---

 pro\_bar

*Pro Bar to get quotations of different financial products*

---

### Description

Return the interface "pro\_bar". "pro\_bar" is an interface like "bar" in tushare. The interface lets you get quotations of different financial products such as stock, mutual fund and index.

### Usage

```
pro_bar(token)
```

## Arguments

token                    Your token. You can obtain it from Tushare Pro website after logging.

## Examples

```
## step 1. Use your token and call Tushare::pro_bar to get pro_bar interface
## You can get your token from the Tushare Pro website<https://tushare.pro>.
## Check details via visiting <https://tushare.pro/document/1?doc_id=38>
## and <https://tushare.pro/document/1?doc_id=39>.

## Not run: bar <- Tushare::pro_bar(token = 'YOUR TOKEN HERE')
```

## step 2. Use "bar" to get quotations of different financial products via passing specific parameters(see next lines). There are some examples after paramters introduction.

```
##
## parameters for "bar"
##
## ts_code:            the code to specify stock, fund or other products
## start_date:        the start date
## end_date:           the end date
## freq:              frequency, support 1/5/15/30/60 minutes, Weekly/Monthly/Quarterly/Annually
## asset:             security type,
##                    "E": stock, LOF
##                    "I": index
##                    "C": digital coin
##                    "F": forward/future/other stock and index except "A Share Stock"
## market:            code for market
## adj:                adjusted price, None/hfq/qqf
## ma:                 moving average price, a number, 5 for ma5, 10 for ma10 ...
## retry_count:       times to retry
```

## Example 1. Two ways to get quotations of index

```
## Not run:
  api(api_name = 'index_daily', ts_code = '000001.SH', start_date = '20181001',
      end_date = '20181010')
## End(Not run)
## Not run:
  bar(ts_code = '000001.SH', start_date = "20181001", end_date = "20181010", asset = 'I')
## End(Not run)
## These two instructions will get the same data as below.
```

##	ts_code	trade_date	close	open	high	low	pre_close	change
## 1	000001.SH	20181010	2725.8367	2723.7242	2743.548	2703.0626	2721.013	4.8237
## 2	000001.SH	20181009	2721.013	2713.7319	2734.3142	2711.1971	2716.5104	4.5026
## 3	000001.SH	20181008	2716.5104	2768.2075	2771.9384	2710.1781	2821.3501	-104.8397

```
##    pct_change    vol    amount
## 1        0.1773 113485736 111312455.3
## 2        0.1657 116771899 110292457.8
## 3       -3.7159 149501388 141531551.8
```

```

## Example 2. Two ways to get quotations of stock
## Not run:
  api(api_name = 'daily', ts_code = "000001.SZ", start_date = "20181001", end_date = "20181010")
## End(Not run)
## Not run:
  bar(ts_code = "000001.SZ", start_date = "20181001", end_date = "20181010")
## End(Not run)
## These two instructions will get the same data as below.
##   ts_code trade_date  open  high  low close pre_close change pct_change    vol
## 1 000001.SZ  20181010 10.54 10.66 10.38 10.45   10.56  -0.11  -1.0417 995200.08
## 2 000001.SZ  20181009 10.46 10.70 10.39 10.56   10.45   0.11   1.0526 1064084.26
## 3 000001.SZ  20181008 10.70 10.79 10.45 10.45   11.05  -0.6   -5.4299 1686358.52
##      amount
## 1  1045666.18
## 2  1117946.55
## 3  1793455.283

## Example 3. Get quotations of stock with adjusted price("hfq")
## Not run:
  bar(ts_code = "000001.SZ", start_date = "20181001", end_date = "20181010", adj = "hfq")
## End(Not run)
##   ts_code trade_date  open  high  low  close pre_close change pct_change
## 1 000001.SZ  20181010 1138.65 1151.61 1121.36 1128.92  1140.81  -0.11  -1.0417
## 2 000001.SZ  20181009 1130.00 1155.93 1122.44 1140.81  1128.92   0.11   1.0526
## 3 000001.SZ  20181008 1155.93 1165.65 1128.92 1128.92  1193.74  -0.6   -5.4299
##      vol      amount
## 1 995200.08 1045666.18
## 2 1064084.26 1117946.55
## 3 1686358.52 1793455.283

## Example 4. Get quotations of stock with adjusted price("qfq")
## Not run:
  bar(ts_code = "000001.SZ", start_date = "20181001", end_date = "20181010", adj = "qfq")
## End(Not run)
##   ts_code trade_date  open  high  low close pre_close change pct_change    vol
## 1 000001.SZ  20181010 10.54 10.66 10.38 10.45   10.56  -0.11  -1.0417 995200.08
## 2 000001.SZ  20181009 10.46 10.70 10.39 10.56   10.45   0.11   1.0526 1064084.26
## 3 000001.SZ  20181008 10.70 10.79 10.45 10.45   11.05  -0.6   -5.4299 1686358.52
##      amount
## 1  1045666.18
## 2  1117946.55
## 3  1793455.283

## Example 5. Get quotations of stock with adjusted price("hfq")
## and two moving average prices("ma5" and "ma10")
## Not run:
  bar(ts_code = "000001.SZ", start_date = "20181001", adj = "hfq", ma = c(5,10))

```

```

## End(Not run)
##      ts_code trade_date  open   high   low   close pre_close change pct_change
## 1  000001.SZ  20181101 1187.26 1193.74 1162.41 1169.98  1178.62  -0.08  -0.7333
