Package ‘ipeadatar’

July 28, 2021

Type Package
Title API Wrapper for ‘Ipeadata’
Version 0.1.4
Author Luiz Eduardo S. Gomes [aut, cre],
Jessyka A. P. Goltara [ctb]
Maintainer Luiz Eduardo S. Gomes <gomes.leduardo@gmail.com>
Description Allows direct access to the macroeconomic,
financial and regional database maintained by
Brazilian Institute for Applied Economic Research (‘Ipea’).
This R package uses the ‘Ipeadata’ API. For more information,
see <http://www.ipeadata.gov.br/>.
Depends R (>= 3.5.0)
License MIT + file LICENSE
Encoding UTF-8
URL https://github.com/gomesleduardo/ipeadatar
BugReports https://github.com/gomesleduardo/ipeadatar/issues
Imports stringr, curl, rlang, jsonlite, magrittr, dplyr, lubridate,
purrr, sjlabelled
NeedsCompilation no
LazyData false
RoxygenNote 7.1.1
Repository CRAN
Date/Publication 2021-07-28 11:20:06 UTC

R topics documented:

available_countries ........................................ 2
available_series ........................................... 2
available_subjects .......................................... 3
available_territories ....................................... 3
available_countries  List with available countries

Description
Returns a list with available countries from Ipeadata API database.

Usage
available_countries(language = c("en", "br"))

Arguments
language  String specifying the selected language. Language options are English ("en", default) and Brazilian portuguese ("br").

Value
A data frame containing 3-letter country code and name of available countries.

Examples
# Available countries
all_countries <- available_countries()

available_series  List with available series

Description
Returns a list with available series from Ipeadata API database.

Usage
available_series(language = c("en", "br"))

Arguments
language  String specifying the selected language. Language options are English ("en", default) and Brazilian portuguese ("br").
available_subjects

Value
A data frame containing Ipeadata code, name, theme, source, frequency, last update and activity status of available series.

Note
The original language of the available series’ names were preserved.

available_subjects    List with available subjects

Description
Returns a list with available subjects from Ipeadata API database.

Usage
available_subjects(language = c("en", "br"))

Arguments
language    String specifying the selected language. Language options are English ("en", default) and Brazilian portuguese ("br").

Value
A data frame containing code and name of available subjects.

Examples

# Available subjects
all_subjects <- available_subjects()

available_territories    List with available territorial divisions

Description
Returns a list with available Brazilian territorial divisions from Ipeadata API database.

Usage
available_territories(language = c("en", "br"))
Arguments

language String specifying the selected language. Language options are English ("en", default) and Brazilian portuguese ("br").

Value

A data frame containing unit name, code, name and area (in km2) of Brazilian territorial divisions.

ipeadata

Returns a database about the requested series

Description

Returns a list with available database about the requested series.

Usage

ipeadata(code, language = c("en", "br"), quiet = FALSE)

Arguments

code A character vector with Ipeadata code.

language String specifying the selected language. Language options are English ("en", default) and Brazilian portuguese ("br").

quiet Logical. If FALSE (default), a progress bar is shown.

Value

A data frame containing Ipeadata code, date, value, territorial unit name and country or territorial code of requested series.

Note

The Ipeadata codes may be required by available_series().

References

This R package uses the Ipeadata API. For more information go to http://www.ipeadata.gov.br/.

metadata

Examples

# Data from
# "PRECOS12_IPCA12": Extended National Consumer Price Index (IPCA), Brazil
dataBR <- ipeadata(code = "PRECOS12_IPCA12", language = "br")

---

metadata

*Returns a metadata about the requested series*

Description

Returns a list with metadata information about the requested series.

Usage

```r
metadata(code, language = c("en", "br"), quiet = FALSE)
```

Arguments

- **code**
  - A character vector with Ipeadata code.
- **language**
  - String specifying the selected language. Language options are English ("en", default) and Brazilian portuguese ("br").
- **quiet**
  - Logical. If FALSE (default), a progress bar is shown.

Value

A data frame containing Ipeadata code, name, short comment, last update, theme name, source’s name and full name, source’s URL, frequency, unity, multiplier factor, status, subject code and the country or territorial code of requested series.

Note

The original language of the available series’ names and the comments were preserved. The Ipeadata codes may be required by `available_series()`.

References

This R package uses the Ipeadata API. For more information go to [http://www.ipeadata.gov.br/](http://www.ipeadata.gov.br/).

Examples

# Metadata from
# "PRECOS12_IPCA12": Extended National Consumer Price Index (IPCA), Brazil
meta <- metadata(code = "PRECOS12_IPCA12")

search_series

---

List with searched series

Description

Returns a list with searched series by terms from Ipeadata API database.

Usage

search_series(terms = NULL, fields = c(\'Var\', \'Var\'), language = c("en", "br"))

Arguments

terms A character vector with search terms.
fields A character vector with table fields where matches are sought. See 'Details'.
language String specifying the selected language. Language options are English ("en", default) and Brazilian portuguese ("br").

Details

The fields options are "code", "name", "theme", "source", "freq", "lastupdate" and "status".

Value

A data frame containing Ipeadata code, name, theme, source, frequency, last update and activity status of searched series.

Note

The original language of the available series’ names were preserved.
