aspredicted\_prereg      *AsPredicted.org template*

---

### Description

Knit a PDF document using the AsPredicted.org questions

### Usage

```
aspredicted_prereg(...)
```

### Arguments

...                    additional arguments to [pdf\\_document](#); template is ignored.

### Examples

```
## Not run:
# Create R Markdown file
rmarkdown::draft(
  "my_preregistration.Rmd"
  , "aspredicted_prereg"
  , package = "prereg"
  , create_dir = FALSE
  , edit = FALSE
  )

# Render file
rmarkdown::render("my_preregistration.Rmd")

## End(Not run)
```

---

brandt\_prereg                    *Brandt et al. Replication Recipe Preregistration template*

---

### Description

Knit a PDF document using the questions suggested by Brandt et al. (2013)

### Usage

```
brandt_prereg(...)
```

### Arguments

...                    additional arguments to [pdf\\_document](#); template is ignored.

prereg

*R Markdown Templates to Preregister Scientific Studies*

---

## Description

The provided **R Markdown** templates are based on the **Center for Open Science Preregistration Challenge**, the **AsPredicted.org** questions, a template suggested for social psychology by van 't Veer and Giner-Sorolla (2016), and the replication recipe suggested by Brandt et al. (2013).

## System requirements

Before using **prereg** to create a preregistration document, make sure the following software is installed on your computer:

- **RStudio** ( $\geq 0.98.932$ ); if you don't use RStudio, you need to install **pandoc** using the **instructions for your operating system**
- A **TeX** distribution (2013 or later; e.g., **MikTeX** for Windows, **MacTeX** for Mac, obviously, or **TeX Live** for Linux)

If you are running *Windows*, use MikTeX if possible. Currently, pandoc and the Windows version of TeX Live **don't seem to like each other**. Make sure you install the *complete*—not the *basic*—version.
