# 0. A Guide to readJDX Vignettes

true

2021-09-20

```
##
## readJDX is tested with > 175 files before release.
## However, there are still challenging files out in the wild.
## If you have trouble importing a file, please file an issue at
## github.com/bryanhanson/readJDX/issues
```

This vignette is based on `readJDX` version 0.6.1.

---

The following vignettes are available, in addition to this one:

- *readJDX*, a general introduction and overview.
- The following vignettes will be useful for those wishing to contribute to the development of `readJDX` and those that are troubleshooting files:
    - *Taxonomy* describes a taxonomy of JCAMP-DX file formats along with a diagram of which `readJDX` functions call each other.
    - *MiniDIFDUP_1* is an annotated version of the `MiniDIFDUP` data set illustrating the ASDF compression scheme.
    - *MiniDIFDUP_2* is an expanded and annotated version of the `MiniDIFDUP` data set.

To see the last two vignettes (in PDF format), do the following:

```
browseVignettes("readJDX")
```
