Introduction to the Reproducible Open Coding Kit (ROCK)

Gjalt-Jorn Ygram Peters & Szilvia Zörgő

2024-01-21

The Reproducible Open Coding Kit (ROCK) was developed to facilitate reproducible and open coding, specifically geared towards qualitative research methods.

To code something with the ROCK, add the code to the line you want to code, in between two pairs of square brackets:

Some example text, and some more. [[look_a_code]]
And the end.

This vignette was originally the introduction to the ROCK, but has become outdated. In addition, there are now a number of other resources. Until this vignette has been replaced with a new up-to-date tutorial, please consult https://rock.science.
